International Limousin Congress in Denmark – Register NOW!

In less than 3 months the World Congress is running in Denmark, and a very interesting programme can be expected by all the participants.

Due to technical reasons, the registration date has been postponed until 10th of April. Registration after this date will be added 10 % registration fee. Be sure to be able to stay at the same Hotel as all the other participants: Register latest 10th of April!

Register now - Click here: <http://www.conferencemanager.dk/ilc>

Many Danish Limousin breeders will welcome you

On the first day of the World Congress, our guests will arrive at Hotel Propellen in Billund. Danish Limousin breeders will be at the official opening of the Congress and at the following Dinner on the Hotel. There will be speeches for the guests and there will be time to meet former and new participants of the World Congress.

Visit to Legoland on the first day in Denmark

Hotel Propellen is close to Billund Airport. Guests that arrive in Billund Sunday or Monday morning, will have the opportunity to visit the World famous Legoland. This is close to both Billund Airport and Hotel Propellen. Legoland is a fantastic place for exploring, and this year something new and very interesting can be seen, Penguin Bay. Here you have the opportunity to get very close to living penguins. Have a look on this link:

Exiting visits to Danish Limousin farmers

Visits to 5 Limousin farmers have been planned on the World Congress.

One of the visits is at Højgaarden Limousine, which is placed in the eastern part of Jutland. The herd is owned by Karin and Jørn Højgaard Sørensen. Jørn was Chairman of Danish Limousin Association for 12 years, and today he and Karin has a farm with 60 Limousin cows. The farm is placed with a very beautiful view of Aarhus Bay and close to Mols Bjerger (mountains). This is not really mountains, but a hilly area made by the last Ice Age.

In Mols Bjerger we will also have a look of Skovkvæget (forest cattle). This is a special breed, that has been made by crossing 9 different (beef) cattle breeds and 2 dairy cattle breeds. The politicians in Denmark focus a lot on environmental protection, and here Skovkvæget takes care of the nature by grassing.

The polled Limousin is very popular in Denmark. On the 4th day of the World Congress we will visit Akkedal Limousine, which is placed in the northern Jutland. At Anni and Ejner Jeppesen focus has been on the polled gen for many years, and this can clearly be recognised in this herd.

Three more farm visits has been planned at Limousin breeders, that each have a interesting story to tell.

We also have Limousin guides, and they are very keen to help you during the whole World Congress in Denmark. We guarantee you some fantastic days in Denmark!

We are all looking forward to show you our lovely green Denmark and a lot of Limousin!
